STATE OF ALASKA
DEPARTMENT OF NATURAL RESOURCES
Division of Mining, Land and Water

Northern Region Land Office, Fairbanks (907) 451-2740
Southeastern Region Land Office, Anchorage (907) 269-8552
Southeast Region Land Office, Juneau (907) 465-3400

Dear Applicant:

The Department of Natural Resources, Division of Mining, Land and Water’s (DMLW) regional land offices are responsible for managing state land and resources. Certain activities on state land require a land use permit, while other activities are considered "generally allowed" or require other authorizations. Commercial recreation facilities that remain no longer than 14 days in any one site may obtain a commercial recreation permit rather than a land use permit. Additional information and forms are available at any Division of Mining, Land and Water regional land office and the Public Information Centers in Anchorage and Fairbanks.

Land Use Permits:
- authorize the temporary use of state land or resources;
- can be issued for up to five years;
- do not convey any interest in state land;
- are revocable with or without cause;
- are not transferable;
- do not constitute waiver of any other state, federal, or local laws; and

A Complete Land Use Permit Application Package includes the following items:

A Land Use Permit application form completed and signed by the applicant. Applicants proposing:
- the use of the uplands and non marine waters must also complete the Supplemental Questionnaire for Use of Uplands and/or Non Marine Waters accompanying this application;
- off-road travel must also complete the Supplemental Questionnaire for Off-Road Travel accompanying this application; and/or
- the use of tide and submerged lands must also complete the Supplemental Questionnaire for Use of Marine Waters accompanying this application.

The site development diagram required in the Supplemental Questionnaire for Use of Uplands and/or Non-Marine Waters and the Supplemental Questionnaire for Use of Marine Waters should show each item labeled so that it corresponds with your description in the Questionnaire. The site development diagram must include:

- **Location** - Section, Township, and Range lines; North arrow; scale; title; legend (may be attached).
- **Boundaries** – Boundaries and dimensions of proposed area of use and their relation to geographic features, including water bodies, and existing trails or rights-of-way.
- **Structures and Storage** - Location and dimensions of buildings, tent platforms, out-buildings and other improvements, and of equipment parking and storage areas, including snow storage areas.
- **Hazardous substances** – Location and dimensions of storage facilities for hazardous substances, including but not limited to oil, lubricants, fuel oil, gasoline, solvents, and diesel fuel. Include method and dimensions of storage (tank, drum, etc.).

Other items that must accompany the application package are:

Land Use Permit Application
Cover Letter (04/07)
Page 1 of 2
Map - a topographic map of sufficient scale to show the location of the proposed activity. The map may be either 1:250,000 or 1:63,360.

Coastal Project Questionnaire (CPQ) - A CPQ is required to identify which state and federal permits are required for activities within the coastal zone. The DMLW will help you determine if the proposed activity is within the coastal zone by referring to the Coastal Zone Boundaries of Alaska (June 1995). If your project is within the coastal zone, please request a Coastal Project Questionnaire from the DMLW office.

Filing Fees - A $100.00 non-refundable filing fee is required by regulation (11 AAC 05.010(5)(B)). Make checks payable to the "State of Alaska".

Other Miscellaneous Items: Items specifically identified and required in any of the supplemental questionnaires.

Completed Land Use Permit Applications should be mailed to one of the following offices:

<table>

</tbody>
</table>

Pre-Permit Issuance Requirements: Prior to issuance of a permit, an applicant is required to submit one or more of the following:

Use Fees - The use fee depends on the type of activity, length of use and the acreage authorized for use. Regulations under 11 AAC 05.010(e)(6)-(9) describe use fees for different activities authorized under land use permits.

Performance Guaranty (Bond) - A performance guaranty is held by the state to assure performance and to pay for corrective action if the use of state land fails to comply with the requirements of the permit. The DMLW uses a bonding matrix to determine the amount of a performance guaranty. Acceptable types of performance guaranties include:

a. cash or check made out to the State of Alaska;
b. a Certificate of Deposit (CD) in the state's name; or
c. a corporate surety bond.

Insurance - Insurance to protect you and the state from liabilities incurred through the use of state property.

Survey - Surveys are generally not required for land use permits. Some authorizations may require a Global Positioning System (GPS) to determine the location of the project.

If you have any questions prior to submitting your application, you are encouraged to meet with a member of the Division of Mining, Land and Water staff about your proposed activity.

**ONLY COMPLETE APPLICATIONS WILL BE ACCEPTED**
Applicants must complete all sections of this application. In addition, applicants proposing:

- the use of the uplands and non-marine waters must also complete the Supplemental Questionnaire for Use of Uplands and Non-Marine Waters accompanying this application;
- off-road travel must also complete the Supplemental Questionnaire for Off-Road Travel accompanying this application; and/or
- the use of tide and submerged lands must also complete the Supplemental Questionnaire for Use of Marine Waters accompanying this application.

Other items that must accompany the completed application are:

- a (non-refundable) $100 application filing fee;
- a 1:250,000 or 1:63,360 scale USGS map showing the location of the proposed activity;
- additional items identified and required in any supplemental questionnaire(s) to this application;
- an Alaska Coastal Management Questionnaire if the proposed use is within the Coastal Zone; and
- additional pages if more space is necessary to answer the questions completely.

Completed Land Use Permit Applications should be mailed to one of the following offices:

**Duration of Project:** The proposed activity will require the use of state land for: (Check one)

[ ] a single term of less than one year. **Beginning month:** Oct 2010 **Ending month:** Jan 2011

[ ] a multi year term for up to 5 years. **Beginning year:** Ending year:

Project Location

Latitude/Longitude or UTM: 58°16'41" / 134°22'50"
or

Section __, Township __, Range __, Meridian __, Copper River
(The spaces below are to be used if the boundaries of the proposed project cross section lines.)

Section __, Township __, Range __, Meridian __
Section __, Township __, Range __, Meridian __

Proposed project will require the use of up to __________ acres. (Add additional sheets as necessary)

Project Description - Describe in detail your intended use of state land. (State land also includes all tide and submerged lands beneath coastal waters and all shorelands beneath other navigable water bodies of the state.) Discuss development and activities. (Attach additional pages as necessary.)

See attached 1A.

Should a portion of the permitted area be closed to the general public? Yes [ ] No [X]. If yes, explain which portion and provide justification for exclusive use:

Site Description - Briefly describe the current condition of the proposed site of use, noting any trash, garbage, debris or signs of possible site contamination (If significant, we recommend you provide pictures to establish initial conditions):

See attached 1B.

Are there improvements or materials on the site now? Yes [ ] No [X]. If yes, briefly describe the improvements, their approximate value, and who owns them (We recommend you provide pictures of improvements):
Site Description continued - Describe the natural vegetation --- ground cover, trees, shrubs --- and any proposed changes. Describe the location of any estuarine, riparian, or wetlands and any noticeable animal use of area.

See attached 1B.

Site Access - Describe how you plan to access the site, and your mode of transportation.

See attached 1C.

If your access is by aircraft, specify the type and size of aircraft:

To access the site, the aircraft is equipped with floats [ ] wheels [ ] skis [ ].

Number of people

1. Indicate the number of employees and supervisors who will be working on the site. 5
2. Indicate the number of customers who will be using the site per year or season. 0
3. Indicate the number of days the site will be used per year or season. 0

Environmental Risk / Hazardous Substances - In the course of your proposed activity will you generate, use, store, transport, dispose of, or otherwise come in contact with toxic and/or hazardous materials, and/or hydrocarbons? Yes[ ] No[ ]. If yes, please describe:

We have conducted extensive testing of the proposed dredge material. We believe that the results of these tests indicate that the material is not toxic or hazardous.

The types and volumes of fuel or other hazardous substances present or proposed:

The specific storage location(s):

The spill plan and prevention methods:
Environmental Risk/Hazardous Substances (continued) - If you plan to use either above or below ground storage containers (like tanks, drums, or other containers) for hazardous material storage, answer the following questions for each container:

Where will the container be located? N/A

What will be stored in the container?

What will be the container’s size in gallons?

Give a description of any secondary containment structure, including volume in gallons, the type of lining material, and configuration:

Will the container be tested for leaks? Yes [ ] No [ ]

Will the container be equipped with leak detection devices? Yes [ ] No [ ]. If no, describe:

Do you have any reason to suspect, or do you know if the site may have been previously contaminated? Yes [ ] No [ ]. If yes, please explain:

AS 38.05.035(a) authorizes the director to decide what information is needed to process an application for the sale or use of state land and resources. This information is made part of the state public record and becomes public information under AS 09.25.110 and 09.25.120 (unless the information qualifies for confidentiality under AS 38.05.035(a)(9) and confidentiality is requested.) Public information is open to inspection by you or any member of the public. A person who is the subject of the information may challenge its accuracy or completeness under AS 44.99.310, by giving a written description of the challenged information, the changes needed to correct it, and a name and address where the person can be reached. False statements made in an application for a benefit is punishable under AS 11.56.210.
Land Use Permit Application Supplemental Questionnaire for:
**Off Road Travel**

Answer the following questions if your proposed activity includes off-road travel.

**Terrain Factor.** Circle the following terrain type(s) that best describes your route of travel:
- Wetlands
- Open, non-tundra or wetland areas.
- Rivers or other water bodies.
- Wooded areas with trees of 6” or greater diameter (at breast height).
- Tundra areas.

**Vehicles and Weight.** List the number and kinds of vehicles to be used for motorized travel, the weight of each vehicle and the weight of each trailer or sled (including loaded weight) to be carried by that vehicle:

<table>
<thead>
<tr>
<th>N/A</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>

**Mileage.**
- State the average total miles traveled in one round trip: __________
- State the number of trips proposed: __________

**Season Factor.** Proposed date(s) of travel will be: **From:** __________ **To:** __________

**Stream and Water Body Crossings.** - Note who you contacted in the DNR, Office of Habitat Management and Permitting:

<table>
<thead>
<tr>
<th>Date:</th>
<th>Person:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Fuel and Hazardous Substance Factor.** The volume of fuel and hazardous substances to be used is the total volume (in gallons) to be carried on one vehicle and any trailers or sleds that vehicle is towing.
- Maximum volume of fuel (in gallons) that is being transported by one vehicle and any trailers or sleds it is towing: __________ gallons.
- Hazardous substances other than fuel:
  - Substance __________________________
  - Substance __________________________

- Do you have an Oil Discharge Prevention and Contingency Plan approved by the Alaska Department of Environmental Conservation? **Yes[ ] No[ ]**
- Do you have either a trained spill response team or a contract with a spill response company? **Yes[ ] No[ ]**
Land Use Permit Application Supplemental Questionnaire for:
Use of Uplands and Non Marine Waters

To be completed to provide more detailed information about projects or activities requiring the use of state owned uplands and non marine waters. All site development details identified in this section must be represented graphically in the scaled drawings on Page 4 of the supplement.

**Temporary Structures** - 1) Describe all temporary improvements (including buildings, tent platforms, out-buildings, docks, floats, and floating facilities), including their dimensions and building materials. 2) Label improvements to be maintained on a year round basis as year round. **Note:** Seasonal improvements must be completely dismantled and removed or stored on or before the end of authorized terms of use.

N/A

Distance structures including pit privies will be located from the ordinary highwater mark of the nearest freshwater body (lake, stream, river, etc), or the mean high water mark of a saltwater body: ____________

**Harvest of Non-Timber Related Forest Products** - Please list the type and quantity of each non-timber related forest product (berries, ferns, willow, mushrooms, birch bark, etc.) to be harvested for commercial use:

N/A

Contact the DNR Division of Forestry to obtain authorizations for the harvest of small trees.

**Motorized Equipment** - List mechanized/motorized equipment to be used, including type, size, purpose, and number of each.

N/A

For stream and water body crossings, note who you contacted in the DNR, Office of Habitat Management and Permitting:

Date: ____________ Person: ____________

**Storage and Parking** - If you plan to store items or park boats, vehicles and/or heavy equipment on the site, describe complete the following:

Describe and give dimensions of long term and short term parking and or storage areas. ____________

N/A

Is parking or storage planned to take place on filled tidelands. **Yes[] No[]**

Does storage involve structures or materials floating in a waterbody? **Yes[] No[]** If yes, describe. ____________
Storage and Parking (continued)

<table>

**Animal Use**

Will there be any use of animals (horses, llamas, dogs, etc.)? **Yes [ ] No [ ]**

Will there be commercial use of the animals (horseback rides, packing, dog sled rides, etc.)? **Yes [ ] No [ ]** If yes, please explain: 

N/A

---

**Dismantle, Removal, Restoration Plan** – Provide a plan for dismantling and removing temporary structures. Include method and timeline for total site restoration: 

N/A

---

**SHORT TERM (PORTABLE) COMMERCIAL RECREATION CAMPS**: Identify commercial recreation activity/activities for which short term (portable) camps will be established to accommodate employees and clients, and provide a general description of the location(s) (e.g. guide use area, game management sub-unit, river, stream, lake, etc.) where the recreational activity/activities and short term (portable) camp use will occur.

- Big Game Guiding: (List up to 3 Guide Use Areas.)

- Sportfishing: (List river corridors, lakes, etc.)

- Boating/Rafting/Kayaking: (List river corridors, lakes, etc.)

- Other Recreation: (Type and general geographic description.)

- Is all or a portion of any of the above identified areas located within the Bering Straits CRSA? **Yes [ ] No [ ]**

- Identify any State of Alaska Refuge, Sanctuary and/or Critical Habitat Area where short term (portable) camps will be used.

Will activities include “day use” of state land managed under the Haines State Forest Management Plan? **Yes [ ] No [ ]**
Land Use Permit Application Supplemental Questionnaire for: 
Use of Marine Waters (Tide & Submerged Lands)

**Tidelands** are that portion of the intertidal zone below the elevation of mean high water. This elevation varies by location. Contact the nearest DNR regional office for assistance. **Submerged lands** are those below the lowest tidal elevation. The State of Alaska, with few exceptions, owns these lands out to 3 miles off shore. – If your activity includes the use of State tide and or submerged lands and the waters above them, answer the questions below and those applicable sections determined below. All site development details identified in this section must be represented graphically in the scaled drawings on Page 9 of the supplement.

Does the applicant own the directly adjacent, upland water front property? Yes [x] No [ ] If no, give name(s) and current address / phone # of that property owner.

Give names and current addresses / phone #s for both upland property owners on either side of the above water front property. ___ See attached 1C. ___

Note: You must obtain the upland owner’s written permission for any use of uplands you do not own including for waste disposal, access to roads, waterlines, power lines, or shore ties above MHW, and you must provide a copy to DNR before a permit is issued. If not the immediately adjacent upland property owner, does the applicant have legal access across the uplands? Yes [ ] No [x] Please explain.

Will your tideland use also involve any use of adjacent State owned uplands? Yes [ ] No [x] (If yes, indicate uses and show on your development plan diagram.) [ ] Shore tie [ ] Waterline [ ] Power line [ ] Access to roads [ ] Other Explain:

**Type of Use, Activity, Development (Answer All)**

Will you be developing / using a Mooring Buoy system or anchoring a commercial or industrial use vessel for more than 14 days? Yes [ ] No [x] (If yes, please also answer all questions in Part 1 on pg. 2 and Part 6 on pg. 8.)

Will you be anchoring or mooring a commercial or industrial related floating facility that is or can be occupied, i.e. a float camp or floating lodge, a float house you rent, a seafood processor? Yes [ ] No [x] (If yes, please answer all questions in Part 2, pgs. 2, 3 and Part 6 on pg. 8.)

Will you be anchoring or mooring your own personal use Float house? Yes [ ] No [x] (If yes, please also answer all questions in Part 2, pgs. 2, 3 and Part 6 on pg. 8.)

Will you be placing non-occupied structures including but not limited to Piling, Dolphins, Fixed docks, Floating docks, or other floating structures? Yes [ ] No [x] (If yes, please also answer all questions in Part 3, pg. 3 and Part 6 on pg. 8.)
Type of Use, Activity, Development (continued)

Are you seeking authorization to use or develop a Log Transfer Facility, a floating Log Storage area, or a Log Ship Loading site? Yes | No. [If yes, please also answer all questions in Part 4, pgs. 4, 5, 6 and Part 6 on pg. 8.]

Will you be placing fill or dredging material on a beach? Yes | No. [If yes, please also answer all questions in Part 5, pgs. 6, 7 and Part 6 on pg. 8.]

Part 1. Anchoring vessels and mooring buoy systems

Does the proposed use location include a known anchorage? Yes | No. [If yes, have alternative locations been considered to reduce impact to the anchorage? Yes | List below. No | If no, explain why.]

N/A

What type of vessel will use the site? [ ] Commercial Fish Tender/Processor [ ] Log Ship [ ] General Cargo Ship [ ] Unoccupied Barge [ ] Fuel Barge [ ] Passenger Vessel [ ] Other:

Does the anchoring vessel require the ability to be able to occupy this site all year long? Yes | No. [If No, what months will the site be needed? From _______ to _______]

What is the maximum swing radius of vessel at anchor? Length ______ feet (distance from anchor to the aft of the vessel)

Will the vessel require the placement of a mooring buoy system? Yes | No. [Number of buoys: _______]

If placing buoys, fill out applicable parts of Part 3 to explain the anchoring system.

Part 2. Floathouses and Commercial, Industrial Floating Lodges, Float camps, Caretaker Residences (including seafood processors). An associated part of approving this type of use is The US Army Corps of Engineers (USACE) permit. Their general permit, GP 89-4N, for occupied floating facilities can be obtained if use and location is found consistent with the AK Coastal Management Program and you meet all conditions of GP 89-4N. Please obtain a copy of GP 89-4N from the Corps, review the conditions and indicate below if your facility will meet all of these conditions. This will help streamline the approval process.

Does your project meet all conditions for general permit GP 89-4N? Yes | No. [N/A]

If no, you must Contact USACE at 1-800-478-2712 and apply for an individual Corps of Engineers permit.

Description of Facility Note: The structures and dimensions must be shown on the development plan diagram

Float Dimensions: float ______ x ______ float ______ x ______ float ______ x ______ Total float area ______ sq ft

Living quarters total area: ______ sq ft. Number of stories: ______ Maximum occupancy ______ persons

Describe other structures on floats, such as storage and generator sheds; give structure dimensions.

N/A

Describe anchoring system and address all that apply: No. of anchors ______ Type ______ Weight ______

No. of Rock bolts ______ No. of Shore ties ______

Other methods ______
Part 2. (continued)

Grounding is prohibited. What is the water depth beneath the facility at extreme low tide

How many feet of maximum draft does the floating facility have

Describe your potable Water Source: type, location, ownership of the source

Wastewater System. Describe how you will handle human waste, black water, grey water

Do you have an approved ADEC marine sanitation system Yes[ ] No[ ] Approval #

Describe how you will dispose of all solid waste including human waste and household garbage generated on facility

Part 3. Non occupied structures - Piling, Dolphins, fixed docks, floating docks, or other floating structures.
Select all boxes that apply for structures located below MHW and show all on the development plan diagram N/A

□ Fixed pile-supported dock, wharf or landing (non-floating) - dimensions ___ x ___ feet No. of pilings ___
□ Ramp to floating dock - dimensions ___ x ___ feet
□ Boat haulout or non-floating ramp - dimensions ___ x ___ feet
□ Floating dock Dimensions ___ x ___ feet; ___ x ___ feet; ___ x ___ feet; ___ x ___ feet;
□ Floating breakwater - materials Dimensions ___ x ___ feet
□ Other floating structures (e.g., net pens, gear storage float) - describe materials, structures, dimensions

□ Storage sheds or similar structures on docks - description Dimensions ___ x ___
□ Bulkhead - type (log crib, sheet pile, etc) Dimensions ___ x ___ Cubic Yards of Fill ___
□ Individual pilings not counted under fixed dock above. Number ___
□ Dolphins - Number ___ Number of piling per dolphin ___
□ Anchors- Number ___ Type ___ Weight ___
□ Rock bolts- Number ___
□ Shore ties- Number ___ Note: You must obtain the upland owner's permission to place shore ties above MHW before a permit is issued.

Note: Grounding is prohibited.
What is the water depth beneath the floating structures at extreme low tide? ___ feet
Part 4. Temporary log transfer facility (LTF) including floating log storage area.
Sitings of an LTF which discharges wood into the marine waters must meet the 1985 Alaska Timber Task Force sitings criteria guidelines and the criteria established under the U.S. EPA's - NPDES general permit and the AK Dept of Environmental Conservation 401 certification. N/A

What is the maximum length of time that you will need to use the facility ____________________________ years.
What will be your seasonal periods of operation? ___________________________________________________________________

What is the total timber volume you need to transfer across this LTF? ________________ mmbf.

How many total acres do you need for this facility? ______________________________ acres.
Note: This acreage must include all improvements including the anchors and lines. It must include the area required for such items as log raft construction, off shore storage, associated barge and vessel moorage, and shoreites.

Does the associated transfer site require a log raft building area? Yes[ ] No[ ] If yes then:

How many boom logs ___________ and anchors ___________ and what is the total length of boom logs ______________ feet, that you need for the rafting area?

Will the log rafts ground or be moored in water at depths less than 40 feet as measured from MLLW? Yes[ ] No[ ]

What is the near shore depth __________ feet, and the offshore depth __________ feet, of the log rafting area as measured from MLLW (0.0' elevation)?

What nautical chart did you use for reference ____________________________, please include a copy of this area of the chart with the attachments.

Will you need an associated in-water log storage area? Yes[ ] No[ ] If yes, then answer the set of questions in the Floating Log Storage Area section of Part 4.

Will you need an associated log ship moorage and loading area? Yes[ ] No[ ] If yes then complete Part 1 on page 2.

What kind of transfer facility do you propose to operate? (i.e. A-Frame letdown, slide ramp, drive down ramp, barge ramp)

Will you be transferring logs into the marine waters?

[ ] No, logs will never be discharged into the water, they will always be transported directly onto barges.

[ ] Yes - new facility. The applicant must conduct a dive survey of the near shore area to document the pre-project underwater topography and habitat conditions that will be covered by the discharge of bark on to the likely one-acre zone of deposit. The initial dive survey must be done to guidelines established for bark monitoring by the USEPA and the Alaska Department of Environmental Conservation. A written report of findings including photographic documentation must be submitted prior to review and consideration of this application.

[ ] Yes - existing facility. Include a report of the last dive survey with attachments. The applicant / operator is responsible to conduct bark monitoring dive surveys, done to the guidelines established by the US EPA and the Alaska Department of Environmental Conservation to document the current extent of bark accumulation at the site.
A written report of current monitoring findings must be submitted prior to review and consideration of this application.

Is this an existing LTF that has been fully approved and used to transport timber in the past? Yes[ ] No[ ]
If Yes, then answer the following set of questions. If No, you are finished with Part 4.
Part 4. (continued)

Was the facility constructed before 1985?  Yes[ ]  No[ ]

Is the facility currently authorized?  Yes[ ]  No[ ]  If Yes, provide the Army Corp of Engineer's Permit Name and number (i.e. Mud bay 43): __________________ and attach a copy of it and all modifications.

What is the ACMP consistency determination number and date of approval? ________________________________

What is the EPA - NPDES authorization number? __________________________ Date of approval _______________ and who is the authorized operator: ________________________________

When was the facility last actively used? ______________ How long was it used for? ______________

How much volume was transferred? ______________ mmbf

What type of log entry system is currently authorized? (i.e. A-Frame letdown, slide ramp, drive down ramp, barge ramp) ______________

Is there a tideland survey for the site?  Yes[ ]  No[ ]  ATS# ________

Does the existing facility require a physical modification?  Yes[ ]  No[ ]  If yes, please submit your modification request to the USACE and include a copy with this application. Please briefly explain the modification.

______________

Floating Log Storage Area

Will the storage area be inside the permit area at the log transfer facility?  Yes[ ]  No[ ]  If no, Will there be a separate tract or tracts?  Yes[ ]  No[ ]  If yes how many tracts do you need? ______ and list below the acreage of each tract. ______

______________

How long do you need to use the storage area (s)? __________________________

How much volume will be moved thru this storage area? __________________________ mmbf.

How many log boom and anchors and what is the total length of the log boom perimeter that will be needed for storage? # of log booms ________________, # of anchors ________________ total length of all log booms ________________ feet.

Will you be using shore ties?  Yes[ ]  No[ ]  If yes how many? ________________ and if you are not the upland owner have you received permission to place shore ties?  Yes[ ]  No[ ]  If yes, provide a copy of this permission, if no, you need to obtain and provide this.

______________

Will the log rafts ground or be moored in water at depths less than 40 feet as measured from MLLW?  Yes[ ]  No[ ]

______________

What is the near shore depth and the offshore depth of the log storage area as measured from MLLW? Near shore depth ________________ feet,  Offshore depth ________________ feet.

______________

What nautical chart did you use for reference ________________. If possible please include a copy with the attachments.
Part 4. (continued)

If the log storage area is one which has been fully approved and used to store log rafts in the past then answer the following:

When was the site last actively used? ____________ and for how long? ____________

If known, how much volume was stored here? ________________ mbf

Is the facility currently authorized? Yes[ ] No[ ] If yes, provide the Army Corp of Engineer’s Permit Name and number (i.e. Mud bay 43) ________________ and attach a copy of the permit and all modifications

What is the DNR authorization number? ________________

What is the ACMP consistency determination number and date of approval? ________________

What is the EPA - NPDES authorization number? ________________ Date of approval ____________ and who is the authorized operator:

Has there been a recent dive survey completed? Yes[ ] No[ ] If yes, then include a copy of this report with the attachments.

Note: The applicant may have to conduct a dive survey of the log storage area to document the underwater topography and habitat that would be covered by the bark zone of deposit or to establish current bark accumulation levels. If required due to level of use, a bark monitoring dive survey must be done to guidelines established by the USEPA and the Alaska Department of Environmental Conservation to document the current conditions at the site.

Part 5. Use that involves dredging, placing fill material or altering beaches.

NOTE: When altering the location of the line of mean high water on a beach by placing fill on or seaward of this line you need to be aware of the following. The line of mean high water (MHW) is the boundary where State (public) ownership of tide and submerged land begins. This boundary is an elevation contour on the beach and is determined by the tidal stage of MHW water elevation against the beach topography. This line is not fixed by a past survey of the upland property if that land survey shows a meandered boundary as is typically done. A meandered boundary is intended to be dynamic and move over time as natural forces affect the beach. Natural forces can either erode beach material or deposit material and as a result, the boundary can naturally move. Another natural way that boundaries can change is in tidal areas where glaciers have recently receded and the land is rebounding or uplifting over time. When any natural process is interrupted by the actions of man, such as placing material to stop erosion, the boundary line becomes fixed from that point on.

What is the elevation of the line of MHW at the proposed permit site? 15.4 feet

Are you proposing to alter the line of MHW in any manner? Yes[ ] No[ ] If yes, explain what you intend to do?

All dredging and slope stabilizing fill is below MHW.

Placing fill material on a beach.

What is the purpose of the fill? To stabilize dredged slopes in harbor basin.

Is there an upland survey that has established a meandered boundary line? Yes[ ] No[ ] If yes, Survey # ________________ (if a subdivision survey please provide a legible copy) (ATS, ASLS, US Survey#)
Part 5 (continued)

Will heavy equipment be used below the mean high water line to alter the beach? Yes [ ] No [X] If yes, explain.

Near shore dredging and fill placement will be performed by an excavator on beach.

How many cubic yards of fill are you proposing to place at and below the line of MHW? 2000 cubic yards

What are the dimensions of fill area below MHW elevation? 770' x 30'

How many linear feet along the (beach) line of MHW will be covered with fill? 770 feet.

Is there more than one area along the beach which will be filled? Yes [ ] No [X] Identify the location of each area on the development plan diagram.

Will any of the fill material come from State owned uplands or tide and submerged lands? Yes [ ] No [X] If yes, then what is the source? and how many cubic yards?

If you are intending to limit beach fill to the area above the current line of MHW will any of the fill or associated retaining wall material including the toe of the fill or retaining wall extend beyond the line of MHW? Yes [ ] No [X] N/A

Is the adjacent upland property encumbered with a public easement along the waterfront boundary? Yes [ ] No [X]

How will the fill affect public access along the beach? It will not

Excavation of materials from a beach.

What is the purpose of the excavation? To increase water depth within the harbor to allow safe vessel passage during all tides

How many linear feet along the beach will be affected? 700 feet

To what depth will you be excavating? -14 MLLW feet 10' Max Depth

How many cubic yards will be excavated from the area seaward of the line of MHW? 30,000 cubic yards and what will this excavated material be used for or where will it be disposed of?

Material to be deposited at Gastineau Channel Disposal site.
Part 6. Dismantle, Removal, Restoration Plan—The permit will require that upon expiration, completion, or termination the site shall be vacated and all improvements and personal property removed. The site shall be left in a clean, safe condition acceptable to the Regional Manager. Your answers to the following questions will establish your proposed restoration plan.

A. Explain how you plan to dismantle and remove the improvements and restore the site to a clean, safe condition acceptable to the Regional Manager. Note: One acceptable alternative is returning the permit site to the condition that existed before the site was developed or used.

N/A

B. If your project involves fill describe how it will be removed and where will it be removed to. How will you document that the original line of Mean High Water has been restored? (i.e. photo documentation, resurvey)

N/A

C. If your project involves anchors and/or pilings how do you plan on removing them? Where is the nearest community that provides this type of removal equipment/service?

N/A

D. Describe the disposal method and identify the disposal site or sites for structural components, solid wastes, and hazardous wastes.

N/A

E. If components can be reused for other projects, such as anchors, identify where they would be stored?

N/A
